

Handleiding: doorschakeling via de centrale

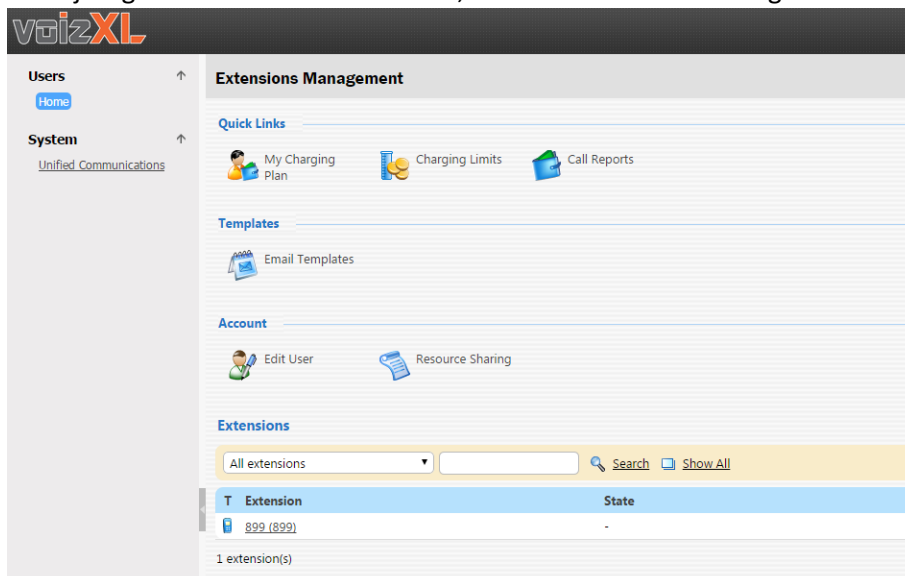

Inloggen op de server

Surf naar <https://sip.voizxl.be> (indien gevraagd moet u de beveiligde verbinding **toestaan**).
Vul uw login en wachtwoord in. Typ indien gevraagd in het derde vakje de code in zoals weergegeven in de afbeelding en klik op de knop "Login".

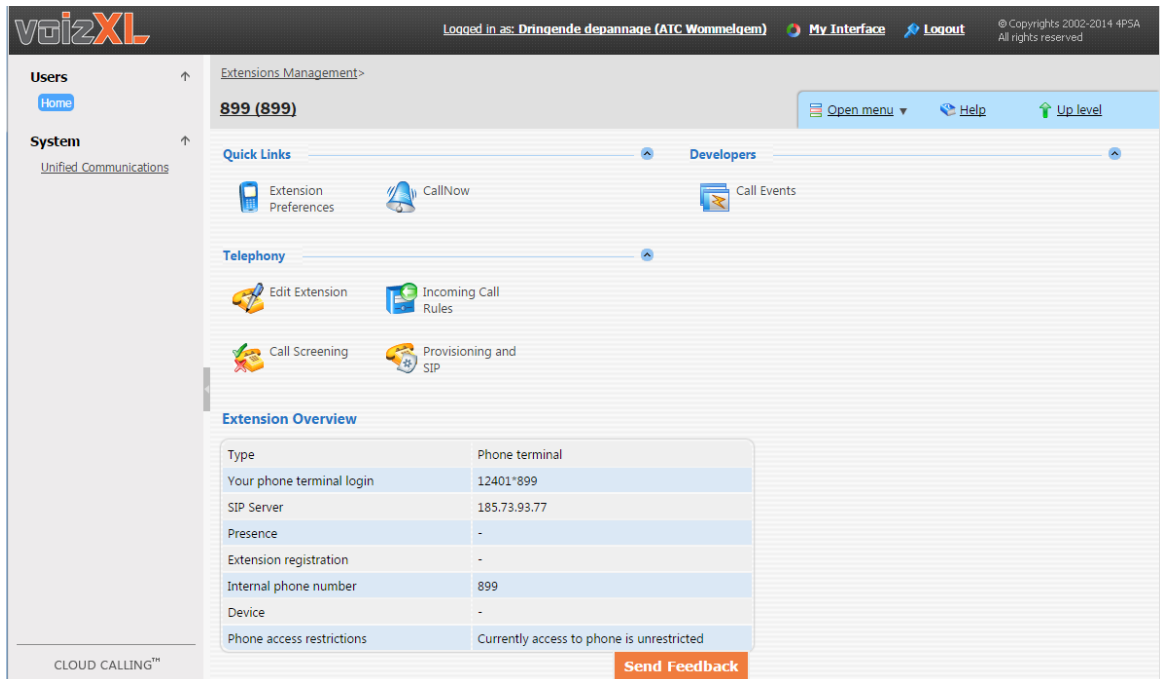

Doorschakeling aanzetten en uitzetten

1. Klik in het nieuw verschenen scherm, onder alle icoontjes en in de kolom "Extension" op de drierijferige extensie. Dit is vaak '999', maar kan ook een ander getal van drie cijfers zijn.

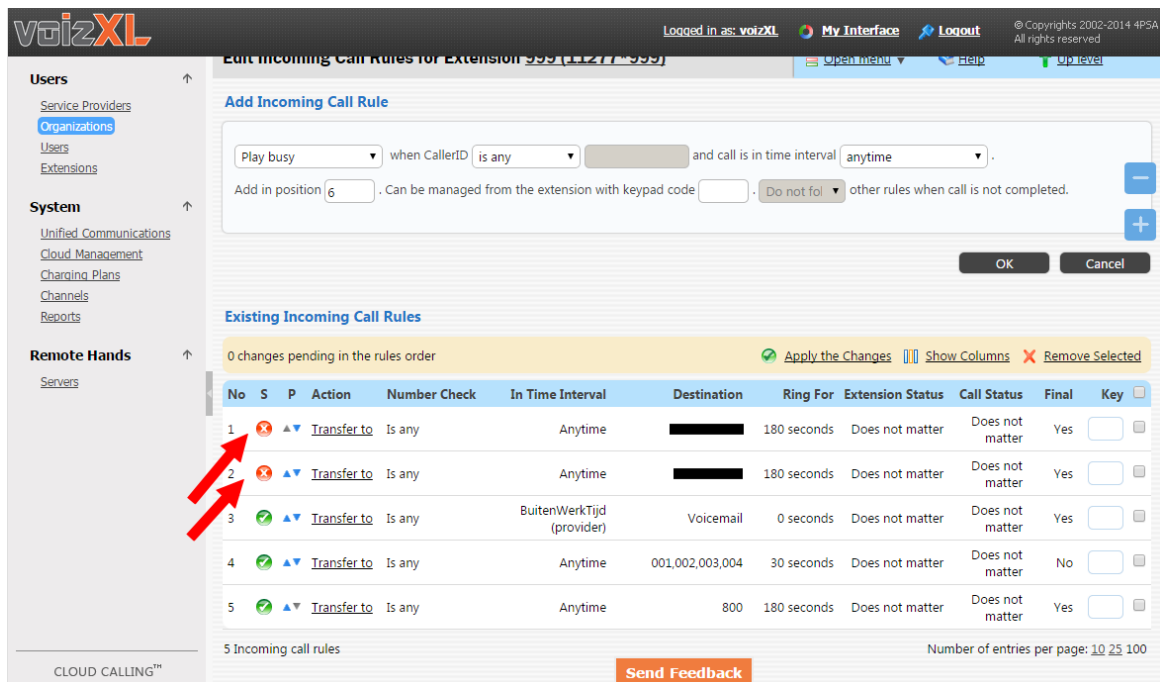

Handleiding: doorschakeling via de centrale

2. Klik in het volgende scherm op “Incoming Call Rules”.

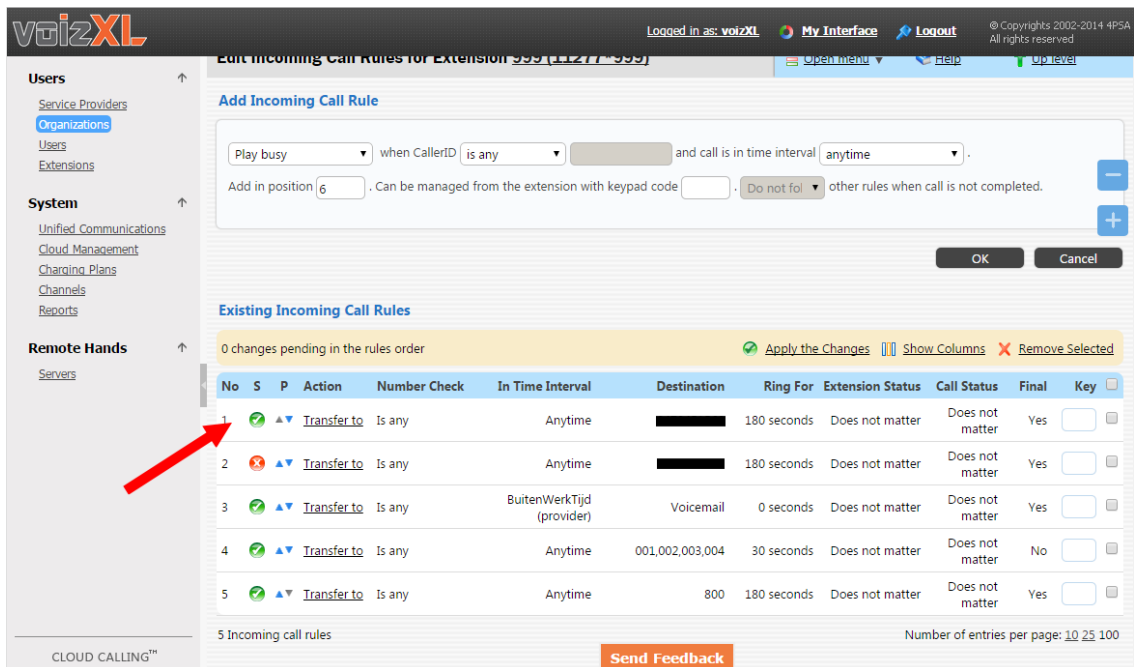

3. Onderaan ziet u “Existing Incoming Call Rules”. Klik op het vakje  naast de gewenste doorschakeling. Het vakje verandert naar . De doorschakeling is nu geactiveerd naar het nummer bij “Destination”.

Handleiding: doorschakeling via de centrale

- Om de doorschakeling weer uit te zetten, klik op het vakje . Het vakje verandert naar  en de doorschakeling is nu weer gedeactiveerd.

Edit Incoming Call Rules for Extension 999 (11277*999)

Add Incoming Call Rule

Play busy when CallerID is any and call is in time interval anytime.

Add in position 6. Can be managed from the extension with keypad code. Do not follow other rules when call is not completed.

Handleiding: doorschakeling via de centrale

Tip bij meerdere doorschakelingen

1. De Server leest de ingevulde doorschakelingen altijd van boven naar beneden en stopt bij de eerst gevonden, actieve doorschakeling.

Om zeker te zijn dat de juiste doorschakeling wordt genomen: zet altijd **alle** doorschakelingen volledig uit en zet enkel de doorschakeling aan die vereist is.
